

The background features a central, glowing orange sun with a geodesium dome structure orbiting it. Various planets, including Earth, Mars, Jupiter, Saturn, and Uranus, are positioned along the dome's path. The scene is set against a dark space background with bright orange and yellow light rays emanating from the sun.

# SpacePark360: Geodesium Edition

An out-of-this-world theme park, with a thrill ride at every planet in the solar system — and music by Geodesium!

**SpacePark360: Geodesium Edition** is an amazing immersive entertainment show for full-dome theaters — an amusement park with its rides placed throughout the solar system. It's an E-Ticket ride of astronomical proportions!

If you're a theme park ride aficionado, you may recognize some of these famous behemoth rides... but you probably never imagined them at such extra-terrestrial locations.

Audio-visual experiences like these are what make your dome theater environment unique. Whether you choose to show all nine rides as a standalone feature, or opt to offer a single ride as a special "encore" or "dessert" after your main presentation, **SpacePark360: Geodesium Edition** will be an unforgettable treat for audiences of all ages.

**SpacePark360: Geodesium Edition** is a collaboration of two cosmically creative companies: Dome3D and Loch Ness Productions. Each individual ride begins on the bridge of a futuristic spaceship that's transporting you on your tour of the solar system. The ship's monitor screens display some quick facts about the location and the attraction; the ride is previewed as a "wire-frame" model, so you'll get an idea of what's in store for you. The transporter doors iris open... and away we go!

Just one dizzying ride will provide enough stimulation for some audiences, especially younger age groups. Ordering rides *a la carte* allows you to pick and choose the ones you like best, and can provide some relief if your budget dollars are feeling stretched.

For more adventurous programmers, the full-length show provides a unique, new alternative to offer those late-night light show crowds looking for the latest "eXtreme eXperience". It provides an introductory "glamour pass" of the SpacePark360 transport ship, which then segues into the first ride, *Quicksilver*. The rest of the rides follow in sequential order, but rather than having a flash of credits at the end of each one (as the individual movies have), they're all in one extended finale sequence, which segues from the last ride, *Diablo*.

When you get the full-length show, we also provide all nine individual rides as standalone movies in addition. This allows you the option of running an individual ride or several on their own, without the need for programming to excerpt them from the long feature. Licensing the complete show gives you more scheduling options and flexibility.

## SpacePark360: Geodesium Edition INDIVIDUAL RIDES

Running time ~4:30 each ride

MOVIE SIZE	RESOLUTION	50-YEAR LICENSE	PRODUCT CODE (# = ride)
SMALL/MEDIUM	single channel, smaller than 2000 pixels	\$920	SPI #-S
