# Origins of Life

*The fulldome video planetarium show that shakes the world of Earth/Life/Planetary science to its core!*

Produced by Mirage3D

Distributed by  
Loch Ness Productions

*Origins of Life* deals with some of the most profound questions in life science: the origins of life and the human search for life beyond Earth.

Starting with the Big Bang, in chronological order, the show deals with the prebiotic chemistry in the universe, the formation of stars, formation of solar systems, and the first life on Earth. *Origins of Life* then covers the great extinctions, as well as our search for (primitive) life beyond planet Earth. *Origins of Life* is an inspirational journey through time — and a celebration of life on Earth. It features many recent discoveries related to life science, demonstrating that if there was ever a time that science made its greatest advances, it's right now!

Running time: **23:00**      Suitable for: **Family audiences**      Year of production: **2005**  
Information about: **Earth sciences planetary sciences, astrobiology, biology.**
